DETAILED ACTION

Drawings

1. Figures 1, 2 and 8 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: the continuing data in page 1 is missing, the typo character in the phrase "The oxygen feed chamber **4**" in paragraph 13 (emphasis added), and the typo error in the phrase "**Internal** Application" in paragraph 41 (emphasis added).

Appropriate correction is required.

3. The lengthy specification has not been checked to the extent necessary to

Art Unit: 1795

determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2, 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the recitation "substrates" is confusing as to its relationship to the substrate recited in claim 1.

In claim 4, the limitation "said heater ... from above" is a redundant of and broader than claim 3.

In claim 5, the limitation "said heater ... zirconia" is a redundant of and broader than claim 3.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to

Art Unit: 1795

be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dalton (US 6,888,116 B2). Dalton's invention is directed field concentrators for artificial dielectric systems. Dalton discloses a field concentrator disposed on a surface of a substrate, embedded on a substrate or embedded on a surface of a substrate, wherein the substrate can be a steatite (a ceramic), and the material for the field concentrator can be calcium aluminate (paragraph crossing c. 34 and 35, c. 367, l. 8-20, and c. 35, l. 15-58, or claims 1, 3 and 5). The difference between Dalton and the above claim 6 is the intend use of the device. The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the reference's teachings because it has been held on the intended use of a device that "apparatus claims cover what a device is, not what a device does", *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 15 USPQ 2d 1525.

Allowable Subject Matter

8. Independent claims 1 and 3 and their dependent claims 2 and 7-11 are allowed (with claim 2 if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action).

Art Unit: 1795

9. The following is an examiner's statement of reasons for allowance: Because the prior art references do not disclose, in a negatively charged oxygen atom production system adapted to heat a member comprising a calcium aluminate composite oxide for extraction of negatively charged oxygen atoms, the recited arrangement of a heater in relation to the calcium aluminate composite oxide in a thin-film formed on a substrate as claimed in claims 1-5 and 7-11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

10. Claims 1, 3 and 7-11 are allowed and claims 2 and 4-6 are rejected.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kishor Mayekar whose telephone number is (571) 272-1339. The examiner can normally be reached on Monday-Thursday.
